

General VanHerck (N/NC/CC) at N2X

Our **Vision** is to be a Mission Focused Collaboration and Innovation Ecosystem for Private Industry, Academia, Government, and Allies by Serving as a Trusted Agnostic Partner to Accelerate Solutions for the Execution of the National Defense Strategy, Advancement of Civil Programs, and Economic Development of Communities.

Lt Gen "JT" Thompson (SMC/CC) with Space CAMP Team

Our **Mission** is to:

Initiate, Cultivate, and Enhance public-private partnerships between industry, academia and government in support of the national security innovation base.

Facilitate the integration of solutions by creating opportunities and engagements for all factions of the traditional aerospace and defense industry along with non-traditional start-ups and entrepreneurs.

Advance innovative and disruptive technologies by providing a platform to incubate, accelerate and decrease 'time to market' for technologies that support government missions.

OUR CAMPUSES

Our Main Campus stands at the center of a sprawling 12 acres in Downtown Colorado Springs, encompassing over 200,000 square feet of program areas, executive offices, research and development facilities, meeting spaces and more.

Catalyst Campus facilitates a variety of activities, from acceleration and DevSecOps programs, to research and development, to promoting small business integration.

Catalyst Campus - College Park, Maryland

This approach allows for maximum flexibility and adaptability with cutting-edge technologies, subject matter expertise, and real-time data integration.

In February, 2021 we opened our first expansion to the University Maryland's Discovery District.

Catalyst Campus plans to expand our Colorado Springs footprint through new construction offering a space combat range, research and development laboratories, additional executive office suites, and residential offerings, in addition to a nationwide extension of the brand.

ECOSYSTEM AT WORK

Economic Impact

Catalyst Campus economic impact is measured through the direct effect of the businesses physically at the Campus, the B to B impact between local businesses and Campus tenants, and the induced impact of all these employees being active consumers and taxpayers in the community.

1,193 jobs were attributable to Catalyst Campus in 2019

These jobs generated **\$89.3 million** in labor income for workers

The net increase in goods & services to the region (GMP) was **\$134.8 million**

In 2019, there was **\$271.6 million** more circulating in the economy because of Catalyst Campus

This activity generated **\$26 million** in local, state & federal taxes

The Catalyst Accelerator has hosted **79 companies**, generating over **\$202 million** in follow-on funding

Programs

The unique ecosystem of public/private partnering at Catalyst Campus has allowed for the creation and curation of many class-leading programs. Active partnerships have enabled the creation and growth of several programs, which make commercial state-of-the-art technologies and rapid development practices accessible to the DoD. Learn more about our programs at CatalystCampus.org.

Campus Community

While many individual companies and organizations call Catalyst Campus home, it is the synergy and connectivity that exists among this community that is wholly unique to Catalyst Campus.
